Education

THU (Tunghai University)

DIPLOMA OF FOOD SCIENCE

iSpan - MFEE37

FRONTEND WEB DEVELOPMENT BOOTCAMP

About Me

I enrolled in iSPAN's Front-end Engineer Career Development Program, where I completed 516 hours of training. During this period, I created a static website for a fast-food restaurant using HTML, CSS, and JavaScript. In a later group project, we developed a customized cookie gift box website. My focus was on the product page, customization options, shopping cart, and database creation using HTML, CSS, JavaScript, EJS, and MySQL. After graduation, I further honed my skills by building an online portfolio using React and developing a small-scale social media application using Vue. I am excited to apply my front-end skills in real-world scenarios.

Skills

Front-end Technologies

- **Languages & Frameworks:**
HTML, CSS, JavaScript, React, Vue, Vuex
- **Styling & Pre-processors:**
Scss, Bootstrap
- **Template Engine:**
ejs

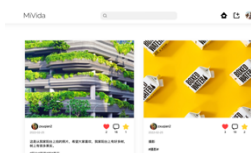

Back-end Technologies

- **Server Frameworks:** Node.js, Express.js
- **Databases:** MySQL, MongoDB

Version Control & Collaboration

- **Version Control System:** Git
- **Tools:** Figma

Projects

Social Platform

A small social platform where users can upload photos and posts.

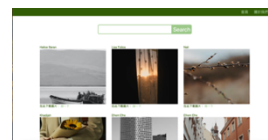

Personal website

Portfolio website

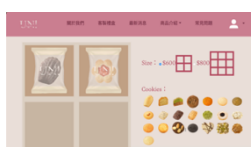

Learning and Teaching Platform (MERN Project)

Students can search and register for classes, and teachers can offer classes for registration.

Stock Photo website

Use the Pexels API to offer a gallery and photo search, helping users find and download free images and videos.

Customized Biscuit Gift Box (Group Project)

A website for customizing cookie gift boxes, with selectable flavors and arrangement display.

Static Fast-food Website

A static site consisting of multiple pages. Includes restaurant menu, contact information, location
